

HB 120-SW

Electronic Personal Attack Button with delay function

The HB 120-SW is an advanced electronic personal attack button that can be used for various functions within in an alarm system.

The HB 120-SW has two push buttons that allow for two separate alarm features. Alarm 1 is activated by a dual button function (red LED indicator) and Alarm 2 by a single button function (green LED indicator).

HB 120-SW has a delay function which triggers when the buttons are pressed as follows:
1 button pressed independently with 300 millisecond delay
2 buttons pressed together with 2000 millisecond delay

It has an anti-tamper switch to protect against unauthorised opening. With its flat and compact size it is discreet and easy to install in most types of environments.
